

CASPER PROGRAM REPORT

January 2015 – April 2015

Warehouse/CDL Training

Developed as a hybrid training to increase job placement opportunities, the Warehouse/CDL training features diverse skills like equipment and tractor-trailer operation, inventory skills and shipping/receiving software.

Parenting	OSHA 10
Customer Service	Workplace
Forklift Training	Communication
Inventory	Financial Literacy
Management	Interviewing

Participants have been placed with local Casper businesses including Knife River, Pepsi, ITC Electrical Technologies and Greiner Buick & Lincoln.

Gaining Confidence: A Participant Story

"I came to CLIMB without much confidence. I knew I could work hard and always do but I was worried about testing and didn't believe I myself. Through the program I gained tremendous confidence and am working towards independence.

It felt awesome that I passed my CDL test on the first try and in fact only missed one point. I thought I wanted a warehouse job but after discovering how much I enjoyed driving and how good I am at it I am looking forward to getting a job where I can drive truck. I feel like now I can provide a better life for me and my kids."

-- Krista, Program Participant
