

CASPER PROGRAM REPORT

June – August 2015

Certified Nurse Assistant (CNA)

Includes 120 hours of CNA studies that focus on clinical training and skills required to pass state board tests: assessing vital signs/blood pressure, bathing, feeding, dressing, proper hand washing, utilizing tet hose, and lifting.

Parenting	Financial Literacy
Communication	Interviewing
Skills	Workplace
Conflict	Safety
Resolution	Nutrition

Primrose Retirement Home
Interim Healthcare

100% Success!

“During CLIMB’s CNA program, participants take a final exam that has to be passed with a 75% or better score to receive a completion certificate. In this group, we had a 100% success rate with everyone passing the exam. This is really exciting as they go on to take the state board tests fully ready for success.

In addition to their clinical skills, this group showed how CLIMB’s group model builds up each individual. Our moms get to know one another, laugh and cry, and discover they are not alone. We had a really quiet mom who just came out of her shell during this training and blew us all away during her mock interview.”

— Lesha Thorvaldson, Casper Program Director
