

CASPER PROGRAM REPORT

CERTIFIED NURSING ASSISTANT (CNA)

SUMMER 2019

Climb

W Y O M I N G

A SPRINGBOARD TO SUCCESS

“The incredibly dedicated and resourceful women in this CNA training showed up open and ready as they put in a lot of hard work to navigate barriers to their success and conquer past struggles. They have a strong drive to use this training as a career springboard, and one grad already has plans to enroll in college.

“I loved the diversity of my group. We found that it didn’t matter our age or background. Just sharing the experience of being a single mom was enough to open up so many opportunities for growth.”
— Christine, Program Participant

CNA’s are so in need here in Casper that these graduates will have a positive impact as they contribute to a wide range of healthcare services. Our community really benefits from their clinical skills and compassionate caregiving.”

— Grace Torres, Program Director

10 MOMS & 15 CHILDREN
served in the program
